

Entrust Authority™ Administrator Training

Hands-on Learning

The Entrust Authority Administrator Training course is an instructor-led hands-on 1-day course that provides you with the answers and skills needed for day-to-day management of Entrust end users. The course begins with an introduction to certificates and the Entrust Authority. The course discusses the various tasks and operations of the Entrust Authority Administrators. Mastery of these skills is achieved through hands-on labs using the Entrust Authority™ Security Manager Administration and the Entrust Authority™ Administration Services.

Course Objectives

Upon completion of this course, participants will be able to understand and perform the day-to-day administrative tasks for Entrust end users, such as user creation and recovery, certificate revocation, key updates, report generation, and bulk operations.

This course is ideal for administrators of Entrust's Managed Services PKI, helping to deepen the understanding of the total new user experience of enrolment and renewal.

Benefits:

- Lower TCO – reduce help desk calls and speed user adoption.
- Improved ROI – facilitate deployments and user acceptance through education of those most involved with the software.
- Effective education – designed for adult learning styles, with visual, verbal, and hands-on instructions.
- Ongoing reference – course manuals provide instructional reference once attendees are back at their jobs.

Entrust Authority™ Administration Services is a web-based application that enables delegated and distributed administration of the Entrust Authority Security Manager PKI with encrypted communication and digitally signed administrative transactions.

Entrust Authority™ Security Manager Administration is a windows-based application that enables authenticated and secure administration of the Entrust Authority Security Manager PKI.
