

Entrust Certificate Management Service

Centralized Management of Digital Certificates

Managing the purchase, deployment, renewal and expiry of digital certificates for multiple Web servers, purposes and users — sometimes in many different locations — can be time-consuming and costly.

The Entrust Certificate Management Service is a self-service application designed to streamline certificate management while providing secure certificates from a trusted brand in online security.

Web-Based Subscription Service

Leverage the power of Entrust's highly available, disaster-protected infrastructure so you always have access to your system.

Entrust's proven Web-based service provides the ability to set certificate expiry dates to suit project schedules and corporate policies, and have a workflow of email notifications ensuring that certificates don't expire unexpectedly.

Certificate Recycling

The service enables you to pre-purchase a number of licenses and "pool" them into a re-useable and re-issuable inventory. While some vendors offer an unlimited re-issuance option on certificate products, the Entrust Certificate Management Service goes further and allows complete re-purposing at any point in the subscription period — maximizing the usage of every certificate license and keeping costs predictable and in control.

Multi-Domain Certificate Support

Secure up to 150 different domains or IP addresses with a single certificate. And domains are pre-approved for immediate issuance 24 hours a day, seven days a week.

Broad Range of Certificates

Entrust digital certificates are the proven, cost-effective method for properly securing your organization. Whether it's a basic SSL certificate, more advanced EV multi-domain SSL certificates, or specialty certificates for secure email, code signing or Adobe PDFs, Entrust offers a comprehensive portfolio of today's most-used digital certificates. And all are supported by Entrust's world-class service.

Choice of Account Model

Choose from an incredibly flexible pooling account, or a budget-oriented non-pooling account model. The different models allow organizations to tailor their certificate purchases with their specific security or budget requirements. From up-front investments to structured certificate lifetimes, Entrust subscription models are designed to fit the needs of any business.

Service Benefits

- Ensure certificates are properly installed
- Inventory digital certificates of all types and vendors
- Provided by the No. 2 SSL certificate vendor per Frost & Sullivan market evaluation

Certificate Discovery

Never be surprised by a certificate again. Locate and inventory all your certificates — internal or externally facing — and manage them with email notifications and policy comparisons. Entrust Discovery streamlines this process with an automated tool that finds, inventories and manages digital certificates across diverse systems to prevent outages, data breach and non-compliance.

Easy, Delegated Administration

Enroll once and request multiple digital certificates from a single intuitive, Web-based system without any software downloads or installations. Delegate administration of groups of certificates to subordinate levels of administrators, so they can manage certificate activity for their groups.

Rather than have certificates expire all at once, or in a haphazard manner, CMS allows you to choose certificate expiry dates to plan renewal activities around resource availability or peak load periods.

SSL Install Check

Automatically verify your SSL certificates to ensure they are properly installed and publicly trusted. And it's quite easy. Simply key in your fully qualified domain name into Entrust SSL Install Check tool to validate your SSL certificate installation, confirm your IP address and server type, and it will tell you if all chain certificates have been installed correctly. If any of the certificates are missing, the tool will provide instructions to fix the problem.

Customer Satisfaction

More than 98.5 percent of Entrust's CMS customers renew each year. We assign you a dedicated account representative who's there to answer all of your questions. And around-the-clock support is also available to enhance your peace of mind.

Let's Talk

Our streamlined communication channels make it easier for you to get in touch with us. From click-to-chat, phones, blogs, email and support, it's all been integrated with customer service top of mind. Contact an Entrust Certificate Services representative at **888-690-2424**, email **entrust@entrust.com** or visit **entrust.net**.
