Create integrated, seamless physical and digital payment experiences for your customers with the Entrust Instant Financial Issuance Digital Card Solution

ENTRUST

SECURING A WORLD IN MOTION

Digital Card Solution

- NFC Issuer Wallet
- X-Pays & Merchants Push
- Token Manager
- Card Display
- PIN Display/Change
- Strong Customer Authentication
- Card Alerts

All digital card features in one single SDK

Welcome and Initialization

Video ID Verification

Card Issuing and Activation

Secure Card Display

Secure PIN Display

One software development kit for all digital card services

NFC Issuer Wallet

Turn the mobile banking app into an NFC wallet. Enable banks to keep a strategic relationship with their customers for mobile NFC payment.

Card Display

Securely display the card information in the application. Let your customers pay on the internet without a plastic card.

X-Pays and Merchants Push

Conveniently and securely push the cards into Apple Pay, Google Pay, Fitbit Pay, and e-commerce merchants from the mobile banking app. Simplify digital cards activation from bank apps into all use cases.

PIN Display/Change

Securely display the PIN code in the application and let your customer choose their card's PIN. No need to send or resend a PIN mailer; the PIN is immediately available in the app.

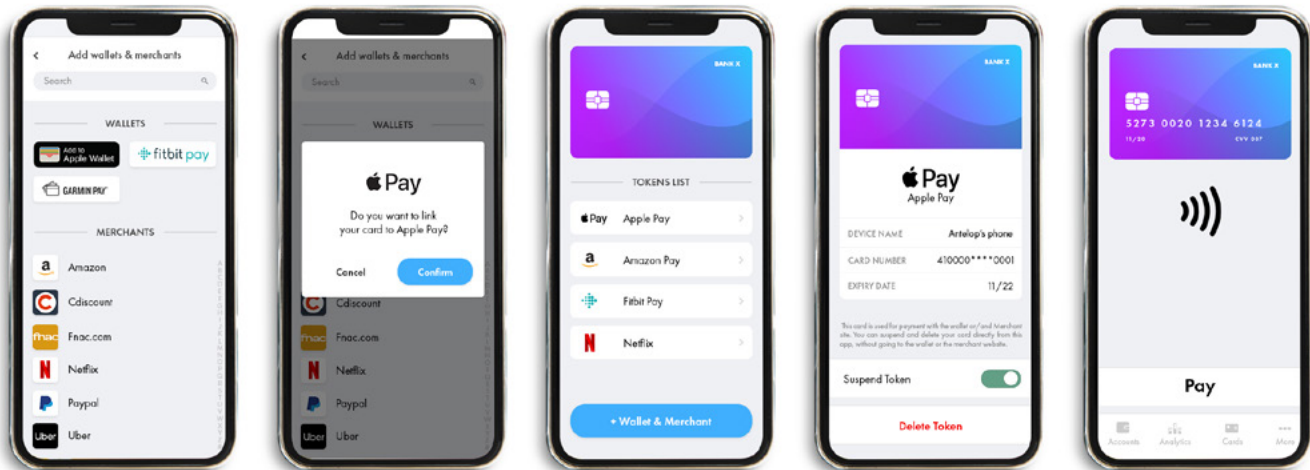

Token Manager

Let the customer self-manage their digital cards. Provide state-of-the-art management service while reducing human support.

Strong Customer Authentication

Use the chip-like security of payment solutions to provide super secure and convenient customer authentication. Helps meet the European PSD2 regulatory compliance with convenient UX.

A simplified integration

A single integration for all features

No need for aggregating providers and solutions anymore. The Entrust SDK covers all features in one single integration.

Built on schemes' services

Relies on the schemes services for easy integration and maintenance.

With integrated security

The solution provides fully embedded protection of all data flows and assets, offering best-in-class security from end to end.

A potentially mobile-only integration

Core digital card features can potentially be integrated in a mobile application without any backend integration.

All digital card features in your banking application

A unique digital card experience

Provide a fully digital and unified card experience to your customers. Offer convenient instant digital card services.

Leading innovation for bank apps

Offer latest digital card features and innovations directly in your mobile banking application.

Simplified integration

A single SDK integration to support all digital card use cases with unique security. ZERO backend integration possible.

A unified service

Trust a mobile-first certified solution/expert. No need to assemble multiple heterogeneous components.

Complementary or standalone

Upgrade your existing bank app and card portfolio with leading Digital Card SDK. Also build new Digital Card programs for your customers with all-in-one solution.

Go mobile-first with the Entrust Digital Card Solution
