

Certificate Solutions Custom Integration Program Track

Whether publicly or privately trusted, the proliferation of certificates in today's digital world has increased the need to manage the complete lifecycle of certificates.

Entrust helps organizations integrate with Entrust public-key infrastructures to lower the total cost of ownership and meet organization-wide security requirements, minimize downtime and prepare customers for the inevitable day when a CA will become obsolete.

Organizations who wish to securely and effectively discover, issue and manage PKI certificates, can register for the Entrust Certificate Solutions Custom Integration Program Track to help enable a digital trust ecosystem. Organizations looking to extend the security of on-premises, hosted PKIs, or a hybrid of both, can deploy Entrust solutions with approved and certified Entrust Ready partner solutions to enable customers to address their digital identity security needs.

The Certificate Solutions Custom Integration Program Track

The Certificate Solutions Custom Integration Program Track is part of the Entrust Technology Alliances Partner Program and is designed to allow partners to leverage the full functionality of the Entrust public key infrastructure (PKI) through APIs.

The preferred integration method for partners in this Program Track is through the use of the Entrust CA Gateway and REST APIs. On a case-by-case basis, and with approval from Entrust, partners also have the option of using other methods of integration, such as the Entrust toolkits.

Upon registration, partners are able to leverage the latest resources to build an integrated solution and also have access to Entrust developer expertise to ensure optimal results.

The Certificate Solutions Custom Integration Program Track gives partners access to:

- Either a fully-configured and dedicated hosted environment or the Entrust products required for installation and configuration in the Partner test environment
- Technical documentation
- A custom Entrust Ready test certification plan specific to the Partner integration
- Support documentation for troubleshooting purposes
- Support and professional services packages to help plan, develop and implement an integrated solution (available via purchase)

Beyond technical validation of the solution, Entrust will work with the partner to market the solution to prospective customers, in addition to other collaborative and promotional marketing activities offered as part of the Technology Alliances Partner Program. As a member of the Program Track, the Partner can use the Technology Alliance Program Partner trademark.

Benefits of the Certificate Solutions Custom Integration Program Track

- Partners gain access to Entrust product, documentation and support
- Partners can claim support for the Entrust industry-leading PKI with their offering
- Together, Entrust and the partner can offer a complete solution and provide a better customer experience by managing all certificates in one solution
- Leverage the Entrust brand

Program Track Obligations

The fee to be part of this Program Track is US\$ 5,000.00 annually if the integration is done with the Entrust REST APIs. The fee to be part of this Program Track is US\$ 10,000 annually if the integration is done with the Entrust Toolkits. For partners doing multiple integrations using both the REST APIs and the Toolkits, the fee is US\$10,000. Additional fees may also apply for optional professional services as mentioned below.

Partner Commitments

As a partner, by joining the Certificate Solutions Custom Integration Program Track you are committing to the following:

- Use the resources provided by Entrust to develop a solution that is integrated with the Entrust PKI
 - Provide Entrust with the equipment and tools necessary to trouble-shoot and support the integration
 - Complete and submit for approval the following:
 - Technical Integration Guide (TIG)
 - Test Result, based on the Test Plan
 - FAQ
 - Mutually agreed go-to-market strategy and basic documentation. The go-to-market strategy will include at minimum:
 - The promotion of the partnership and solution on both the partner and Entrust websites
 - Marketing collateral describing the value of the integration
 - Press release and/or blog article announcing the solution and participation in the Program Track
-

Entrust Commitments

In support of the Certificate Solutions Custom Integration Program Track, Entrust is committed to:

- Provide the choice of either a fully configured and dedicated hosted environment or the Entrust products required for installation and configuration in the Partner test environment
 - Provide all the technical tools necessary to complete the integration, including:
 - A full set of documentation to support the integration
 - Provide for-fee training and technical support options in support of the integration
 - Support for development and test environment issues (included in the fee to enter program track)
 - Integration support (additional fee professional services)
 - Integration consulting (additional fee professional services)
 - For the activities (professional services) with a fee, a specific professional services agreement will be required
 - Review the submitted required documentation and test results for approval of the solution
-

Joint Commitments

Entrust and Partner jointly commit to:

- Promote the joint solution in accordance with the defined go-to-market strategy
- Review the solution at least every six months for enhancements, roadmap, business review or go-to-market activities
- Update the solution for each major release (at least one update a year if required)

The Certificate Solutions Custom Integration Program Track

Subject to completion of the required documentation and approval of the solution by Entrust, the partner will be allowed to use the Entrust Ready trademark.

- The use of the trademark is limited to the specific integration that the Partner has completed and validated with Entrust; The Partner can specify "Entrust Ready for ..."

Summary of the Elements Provided

Stage	Resources/Tasks	Provided by	
		Entrust	Partner
Integration	Hosted or on-premises test environment	√	√
