

ENTRUST

Certified Supplies for Entrust® SD160 Direct-to-Card Printer

HIGHLIGHTS

Intelligent Supplies Technology™

The SD160 Direct-to-card printer features system-matched Entrust patented ribbons that activate additional features exclusive to Entrust. Upon installation, the Entrust proprietary ribbons enable all enhanced product features that help you print high-quality cards more easily.

When a genuine Entrust ribbon is loaded into an SD160 Direct-to-Card printer, the driver automatically adjusts printer settings to match the ribbon type and helps ensure the best possible image quality on the cards. The printer and supplies then collectively track ribbon consumption and notify you of an upcoming ribbon replacement.

Unique color ribbons

The SD160 printer has a unique set of panelized color ribbons that were created to work exclusively with this affordable card printer.

ENSURE PEAK PERFORMANCE

Insist on Entrust Certified Supplies for your SD160 Direct-to-Card printer. Designed exclusively for the printer, our printheads, ribbons, and cleaning supplies can help you achieve the best image quality, most reliable printer performance, and lowest possible cost-per-card. Genuine Entrust ribbons also leverage our patented technology to provide automated color and image density adjustment, ribbon usage tracking, and ribbon conservation.

Certified Supplies for Entrust SD160 Direct-to-Card Printer

Broad range of options

Entrust offers a comprehensive portfolio of supplies to support your issuance program. Our full-color ribbons provide vibrant, life-like images and detail, and unlike comparably priced systems, the SD160 printer includes a UV ink ribbon option to enable easy verification and add additional security to your cards. Our monochrome print ribbons can deliver exceptional results for basic text and printing. We offer an array of conventional colors along with metallics that produce crisp text and fine lined details for even your most complex patterns.

Remarkable image quality

Enhancements in SD160 card printing technology dramatically improve quality and sharpness of photos, graphics, and logos by utilizing optimized print ribbons and user-adjustable image and color controls. The SD160 Direct-to-card printer emulates Microsoft-based sRGB color space to seamlessly reproduce on-screen images onto the card. This provides better color matching and reduces the amount of color adjustments needed, creating less hassle for you.

Convenient installation and cleaning

Replacing supplies is easy in the SD160 printer and a reloadable supplies cartridge with drop-in cleaning roller. Simply run a cleaning card cycle, then open the supplies cover, swap out the old ribbon and cleaning roller with the new one, and resume printing.

Regular cleaning operations will help you keep your SD160 printer running at peak performance. Entrust offers cleaning supplies designed specifically for maintaining your SD160 printer and helps prevent mishandled cards, diminished image quality, or damaged printheads.

All ribbons are packaged as a kit and include all the necessary routine cleaning supplies. This package includes one adhesive cleaning sleeve and one isopropanol cleaning card. When more frequent cleaning is required, additional cleaning supplies can be ordered separately.
