# Entrust® Certificate Services Subscription Plan

Reuse your certificates. Reduce your spend. Restore your sanity.

## HIGHLIGHTS

### Flexibility, cost savings, and support

Our budget-friendly plan gives you command of your TLS/SSL certificate inventory. You can easily reuse decommissioned licenses on certificates that are being used on a short-term basis, like when used for testing or load balancing. Our Subscription Plan presents an opportunity to realize tremendous cost savings while making your life easier.

## KEY FEATURES & BENEFITS

### Budgeting

- Minimize unexpected costs with the potential for term and volume discounts that are valid throughout the account term
- Term discounts are a cost-effective way to purchase certificates; by prepaying your account term, you receive a discount up front based on the length of your account term
- Additional certificates can be purchased on a prorated basis (based on the time remaining on the account) at the original discounted price

### Delivery

- Manage your account with Entrust Certificate Services, our certificate lifecycle management platform

## Reusable licenses for changing web environments

1

### Select account term

Up to 5 years

2

### Set convenient certificate expiration dates

Issue certificates from 10 days-398 days, avoid holidays and busy periods

3

### Take advantage of volume and term discounts

Discounts applied throughout the term

4

### Purchase TLS/SSL certificates

Licenses (purchased mid-term) prorated to account term

5

### Deploy and redeploy

Recycle licenses throughout certificate lifecycle

# Entrust Certificate Services Subscription Plan

« **What I like the most about the Entrust Subscription Plan is the flexibility to build up and tear down certificates as needed.** »

IT Administrator, Medium-Sized Health Care Company

## FACTORS TO CONSIDER

### Is the Subscription Plan right for my organization?

The plan is best for:

- IT environments that experience a lot of change or issue TLS/SSL certificates for short-term projects
- IT environments that require maximum flexibility for certificate issuance and validity periods
- Larger or growing organizations where needs may vary over the account term

## HOW IT WORKS

### Use cases

For example, if you purchase 20 licenses for a three-year account term, you'll receive term and volume discounts. At any time throughout the account term, you can issue and reuse up to 20 TLS/SSL certificates for the validity period you choose. Throughout the account term, you can purchase additional TLS/SSL certificates on a prorated basis at the original discounted price.

# 94%

of surveyed Entrust Certificate Services customers agree that the Subscription Plan is an effective way to save money on digital certificates.
