nShield Cloud Integration Option Pack

Create and control cryptographic keys in your FIPS 140-2 HSM, then securely export to the cloud

HIGHLIGHTS

Provides users of public cloud services with the ability to generate cryptographic keys in their own environment and retain control of those keys while making them available, as required, for use in the cloud of their choice.

- Control of your cryptographic keys supporting a multi or hybrid-cloud strategy
- Secure key generation using a strong entropy source
- Long-term key protection using a FIPS-certified HSM
- Support for Amazon Web Services, Google Compute Engine, Google Cloud Key Management (Google KMS), Microsoft Azure, and Salesforce

Safeguard your keys in the cloud with the highest level of assurance

Protect your brand and data

Validated to the highest security standards, such as FIPS 140-2 and Common Criteria, Entrust nShield® HSMs are ready to protect your data in even the most challenging and demanding security situations, whether on premises or in the cloud.

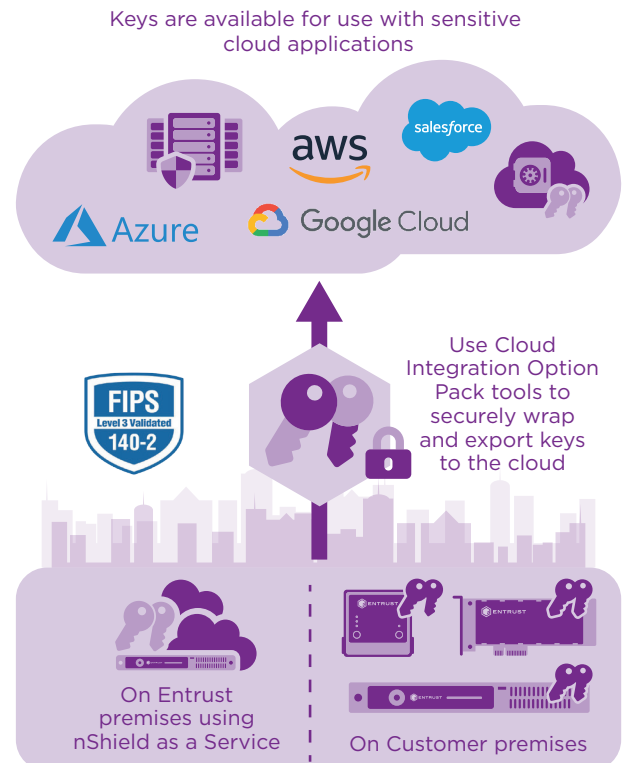

Figure 1. Encryption keys are generated in an nShield HSM, wrapped and exported securely to the cloud

nShield Cloud Integration Option Pack

Supported cloud service providers

nShield Cloud Integration Option Pack (CIOP) provides the tools to allow you to create your cryptographic keys using an nShield HSM, then wrap and securely export them to Salesforce and the following cloud service providers:

- Amazon Web Services (AWS)
- Google Cloud Key Management (Google KMS)
- Google Compute Engine
- Microsoft Azure Key Vault

Key control in hybrid and multi-cloud environments

nShield Cloud Integration Option Pack gives customers the control and assurance they need, whether deploying a hybrid, single cloud service provider, or multi-cloud strategy. By bringing your cryptographic keys to the cloud service provider you avoid the difficulties associated with vendor lock-in, which can make it difficult to migrate from one cloud service provider to another.

Supported configurations

This release has been tested for compatibility on a range of platforms, including:

- Microsoft Windows Server 2019 x64 and Core and 2016 x64
- Microsoft Windows 10 x64
- Red Hat Enterprise Linux
- SUSE Enterprise Linux 15 x64 and 12 x64
- Oracle Enterprise Linux 7.6 x64 and 6.10 x64
- Supported HSMs
 - Compatible with all current nShield models
