

Streamlined Energy and Carbon Reporting (SECR) Report

Methodology:

This assessment has been verified by a third-party (Delta-Simons Limited) to be carried out in general accordance with ISO14064-1:2006 Greenhouse Gases – Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals.

Results:

The table below sets out total energy consumption and resulting GHG emissions by Scope arising from business operations of the Client.

Summary of Greenhouse Gas (GHG) Emissions

Scope	FY20-21		FY21-22	
	kWh	tCO ₂ e	kWh	tCO ₂ e
Scope 1 - Heating Fuels	1,071,046	196.93	838,544	153.59
Scope 1 - Company Vehicles	59,451	14.74	65,234	16.05
Scope 1 - Refrigerants	-	-	-	-
Scope 2 - Purchased Electricity	2,435,090	567.72	2,464,141	523.21
Scope 3 - Business Mileage	103,082	25.56	110,867	27.28
Scope 3 - Air Travel	-	31.86	-	72.01
Scope 3 - Hotel Accommodation	-	2.15	-	4.35
Total Net	3,668,669	838.96	3,478,786	796.49
Intensity Ratios	FY20		FY21	
kWh/sq.ft/year	52.27		49.23	
tCO ₂ e/employee/year	2.99		2.99	

Energy Action Statement:

Entrust is committed to delivering its operational obligations and to reducing its overall carbon footprint. In the period covered by the report, Entrust has continued to invest in remote work technology and created flexible remote work opportunities. These efforts have reduced the need for employee commuting and business travel, resulting in lower carbon emissions in these areas now and into the future. At the Global Headquarters, Entrust upgraded some of its rooftop heating/cooling units and converted exterior lighting to LED, creating improved electrical efficiency and reduced carbon consumption. As of January 2022, Entrust has released its [Carbon Reduction Plan](#) and committed to purchasing 100% of its energy for the Global Headquarters from renewable energy sources. In the future, the organization will continue to explore ways to reduce carbon emissions and protect natural resources.
