

TruCredential Transact Edition

A complete solution to design, issue, and manage student credentials.

Easily create, issue, and manage student IDs and credentials with Datacard TruCredential Transact edition. Meet a wide range of application requirements—from basic photo IDs to high-assurance credentials—and easily scale from a single workstation or user to a multi-workstation application with more functionality.

- Intuitive step-by-step workflow for fast and simple card issuance
- Quick and frictionless out-of-the-box integration
- Configurable system to create custom workflows
- Tailored basic card issuance and integrated solution segments
- Easy, pre-built smart card configurations
- Data collection and management on one central server
