

Adaptive Issuance™ MULTOS Data Prep and Perso Software

Everything You Need for MULTOS Enablement, Data Preparation, and Personalization Issuance

The transition from magnetic stripe cards to EMV chip cards increases the level of complexity in your card issuance process. As part of the end-to-end Adaptive Issuance™ Suite, Adaptive Issuance™ MULTOS Data Prep and Perso Software simplifies this complexity and allows you to migrate seamlessly from magnetic stripe to EMV for MULTOS cards – with minimal impact and cost for your production operations.

HIGHLIGHTS

Simplicity

MULTOS Data Prep and Perso Software is a user-friendly, web-based application that provides an easy way to import MULTOS Application Loaded Templates to configure EMV single-application and multi-application profiles.

Efficiency and Reliability

Proven high-speed runtime software works with Adaptive Issuance™ Chip Interface Software to perform MULTOS Enablement, EMV data preparation, and chip personalization with remarkable efficiency.

Scalability

Pre-loaded libraries of highly configurable profile templates empower issuers with streamlined autonomy over their EMV profiles and data, as well as the flexibility to manage the MULTOS issuance steps for central issuance and/or instant issuance in a scalable design that grows with evolving business needs.

Empowering Secure Issuance Anywhere

As the most trusted name in card issuance solutions, Entrust brings a broad range of experience to simplify and streamline the complexities of smart card issuance. Our software and hardware is deployed in more than 1,500 smart card operations worldwide.

Smart Maintenance

It's essential to keep your smart card issuance program performing at its peak by using the latest software. Entrust continually develops new features and provides updates with each software release. Through our Software Maintenance Agreements (SMAs), you'll have access to important updates as they become available along with the expert technical support you need to keep your program running seamlessly. You'll also reduce your costs long term by taking advantage of regular software updates rather than purchasing new software.

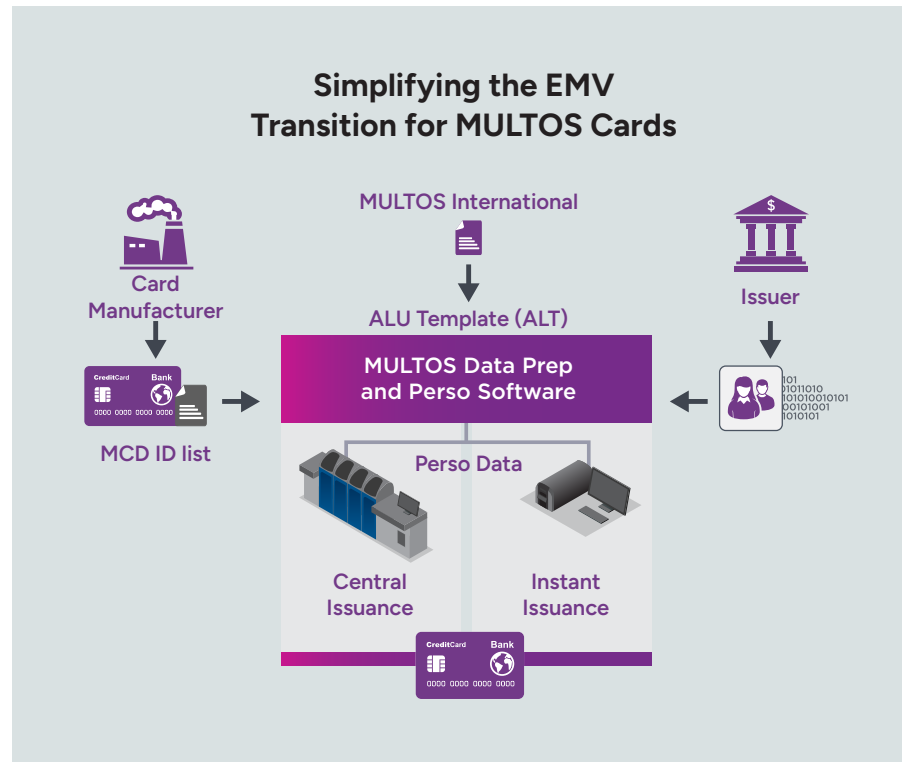

COMPLEMENTARY TECHNOLOGY

Adaptive Issuance™ Key Manager Software

Key Manager Software provides everything issuers need to securely and efficiently manage cryptographic keys through every step of the issuance process. Developed with strict adherence to best practices and industry standards, Key Manager Software can be leveraged for a wide range of applications, including the ability to manage multiple keys through a single software platform.

MULTOS C3 Integration

Available from Professional Services, C3 integration automates MSM data generation in the personalization process.
