

Instant ID as a Service

HIGHLIGHTS

Design, Issue, and Manage Credentials Anywhere, Anytime

Entrust Instant ID as a Service (IIDaaS) redefines credential issuance by combining the power of the cloud with the sophistication of enterprise-grade identity solutions. Built for agility, security, and scale, IIDaaS enables organizations to issue both physical ID cards and digital Mobile Flash Passes from anywhere — without the burden of complex IT infrastructure.

With a sleek browser-based interface, real-time printer dashboard, and seamless integration with Entrust Sigma Series ID Card Printers, users can design credentials, enroll individuals, and manage issuance workflows with ease. Whether you're onboarding employees, students, or citizens, IIDaaS delivers unmatched flexibility and control.

How it works

Instant ID as a Service streamlines the credential issuance process through a cloud-based platform that supports both physical and digital ID creation. The system enables administrators to configure credential designs, enrollment workflows, and user roles, while operators can easily enroll applicants, capture photos and signatures, and issue credentials — all from a browser-based interface. Credentials can be printed or delivered digitally via Mobile Flash Pass. The platform also supports real-time printer management, audit logging, and integration with external systems, ensuring secure, scalable, and efficient issuance operations.

Key Features & Benefits

- Cloud deployment eliminates heavy downloads and IT overhead.
- Drag-and-drop browser interface simplifies enrollment, design, and issuance.
- Mobile dashboard for printer status, supply orders, and support.
- Simultaneous issuance of physical and digital credentials.
- Mobile Flash-Pass supports visual ID and barcode/QR code.
- Encrypted data transmission between software and printer.
- Direct API printer connection and intelligent printing.
- Automatic software updates and included technical support.
- Flexible, scalable, and usage-based monthly pricing.

Four Powerful Entitlements + Mobile Flash-Pass

IIDaaS Essentials

Ideal for organizations starting with credential issuance. Includes mobile credentialing, TIM and embosser support, central user management, and basic data import/export capabilities. Mobile Flash-Pass is included.

IIDaaS Advanced

Adds support for mag stripe encoding, webcam integration, and paginated search filtering. Enhanced data handling and bulk record management. Mobile Flash-Pass is included.

IIDaaS Professional

Supports smart card issuance, QR codes, embedded databases, and customizable workflows. Includes advanced camera support and signature capture. Mobile Flash-Pass is included.

IIDaaS Enterprise

Full-featured platform with SAML authentication, API integration, and comprehensive credential and user group management. Offers the most scalable and secure solution. Mobile Flash-Pass is included.

Feature Comparison Matrix

| Feature | Essentials | Advanced | Professional | Enterprise |
|--|------------|----------|--------------|------------|
| Smartcard Support (MIFARE Classic, DesFire EV1/EV2) | | X | X | |
| Mobile Credential Issuance | X | X | X | X |
| Authentication (SAML SSO) | | | | X |
| Webhooks & API Integration | | | | X |
| Credential Management by User Groups | | | X | X |
| Manage Credential Access by User Groups | | | X | X |
| Database Support (MySQL, SQL Server, PostgreSQL, Oracle) | | | X | X |
| Batch printing | | | X | X |
| TIM Module Support | X | X | X | X |
| Embossing Support | X | X | X | X |
| Central user management | X | X | X | X |
| Default User Groups | X | X | X | X |
| Mag Stripe, Bar Code | | X | X | X |
| QR Codes | | | X | X |
| CSV/ASCII Data File Import | X | X | X | X |
| Multiple Data Sources Support per Workflow/Design | X | X | X | X |
| Online Help | X | X | X | X |
| Mobile enrollment and issuance | X | X | X | X |
| Enhanced Sorting & Print Capabilities for Search Results | | | | X |
| Paginated Search Filter | | X | X | X |
| Bulk Delete Search Records | X | X | X | X |
| Embedded database | | | X | X |
| Import/Export card designs | | | X | X |
| Webcam support | | | X | X |
| Modern Advanced camera support (including DSLR) | X | X | X | X |
| Signature capture | | | X | X |
| Data Driven Production | X | X | X | X |
| Composite fields | X | X | X | X |

Instant ID As A Service(IIDaaS) Suite Standard Features

Credential Designs

- Customize the appearance of credentials using static and dynamic fields.
- Configure fields such as text, images, dates, and user information.
- Generate enrollment forms directly from credential designs.
- Link enrollment form fields with new or existing credential designs.

Enrollment Design

- Define the structure and flow of the enrollment process.
- Configure field connections between enrollment forms and credential designs.
- Enable dynamic data capture for personalized credential issuance.

Enrollment Forms

- Create forms to capture applicant data during credential issuance.
- Support for various field types including text, date, and image capture.
- Link forms to credential designs for seamless data integration.

Enrollment Records

- Store and manage data collected during enrollment.
- Enable search, filtering, and bulk operations on enrollment data.
- Maintain audit trails and history of credential issuance.

Instant ID as a Service Supported Languages

- English
- Spanish
- Japanese
- French
- Portuguese

Instant ID as a Service System Requirements

Instant ID as a Service is cloud-based software that requires one of the following browsers:

- Google Chrome
- Microsoft Edge
- Safari (iOS devices only)
