

# Entrust Digital Card Solution

## HIGHLIGHTS

### The Future of Credentialing

Create a best-in-class digital-first payment and banking experience for cardholders.

With the Entrust Digital Card Solution, you can instantly provide digital payment credentials from your bank or credit union's mobile application to a cardholder's mobile wallet.

## KEY FEATURES & BENEFITS

### One Solution for All Digital Card Services

- **NFC Issuer Wallet:** Turn the mobile banking app into an NFC wallet
- **X-Pays and Merchants Push:** Conveniently and securely push the cards into Apple Pay, Google Pay, Fitbit Pay, Samsung Pay, Click to Pay, and e-commerce merchants from the mobile banking app
- **Token Manager:** Let the cardholder self-manage their digital cards
- **Card Display:** Securely display the card information in the application
- **PIN Display/Change:** Securely display the PIN in the application and let your cardholders choose their PIN
- **Strong Customer Authentication:** Chip-like security of payment solutions provides super secure, convenient customer authentication
- **Card Alerts & Transaction Controls:** Enable cardholders to deactivate lost or stolen cards via bank's application, and to set thresholds and alerts

## Simplified Integration

- One single integration for all features, removing the need for aggregating providers and solutions
- Built on schemes services for easy integration and maintenance
- Embedded protection of all flows and assets
- Core digital card features can potentially be integrated into mobile app without back-end integration

## All Digital Card Features In Your Banking App

A unique digital card experience

Leading innovation for bank apps

Simplified integration

Unified service

Complementary or stand-alone
