# Entrust Certified Supplies

## Opti-Series security features

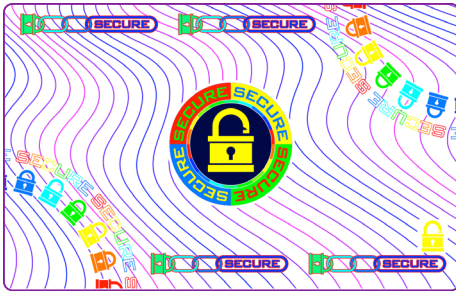

### Design your perfect level of security

Entrust Opti-Series security features offer exceptional flexibility, customization, and security for ID card programs. A broad range of customizable holographic OVD and security print features provide end-users with a selection of overt, covert, and forensic security elements.

With a wide range of security features, these security elements can be combined with logos, text, and graphics to provide flexibility to meet demanding requirements of a wide range of ID applications. With three levels of customized feature sets, we can optimize the solution to the application and budget. Opti-Series security features are available in both DuraGard® laminates and topcoat products.

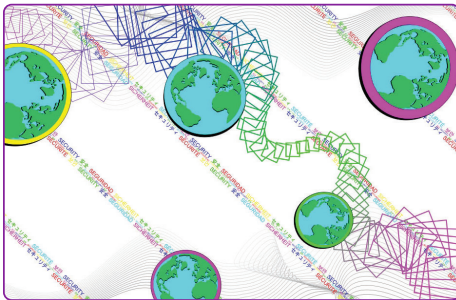

# Opti-Series Security Features

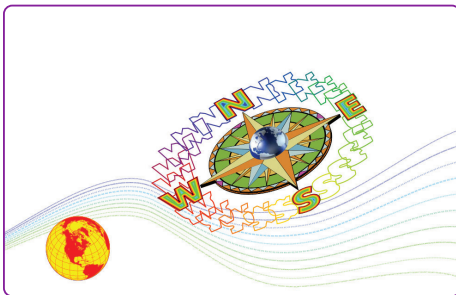

## Entrust OptiGram® Security Feature Set

- Delivers the highest level of security, with an advanced suite of custom level 1, 2, and 3 holographic OVDs (overt, covert, and forensic) and security print features
- Minimum order: 100 rolls

## Entrust OptiSelect™ Security Feature Set

- Most widely used security set, with a custom suite of strong level 1 and 2 holographic OVD and security print features for most applications
- Minimum order: 100 rolls

## Entrust OptiExpress™ Security Feature Set

- Designed for smaller, more cost-sensitive programs that still need a customized feature set that combines a defined selection of level 1 and 2 features (2D hologram, animation, and microtext) and smaller minimal order quantities
- Minimum order: 50 rolls
