

# ENERGIZE YOUR CAMPUS ID CARD PROGRAM

The ultimate identity software technology and deployment options for higher education

**Leverage**  
developments in campus card issuance.

**Modernize**  
and simplify ID card programs.

**Help**  
universities improve overall experience.

**Improve**  
internal processes with software innovation.

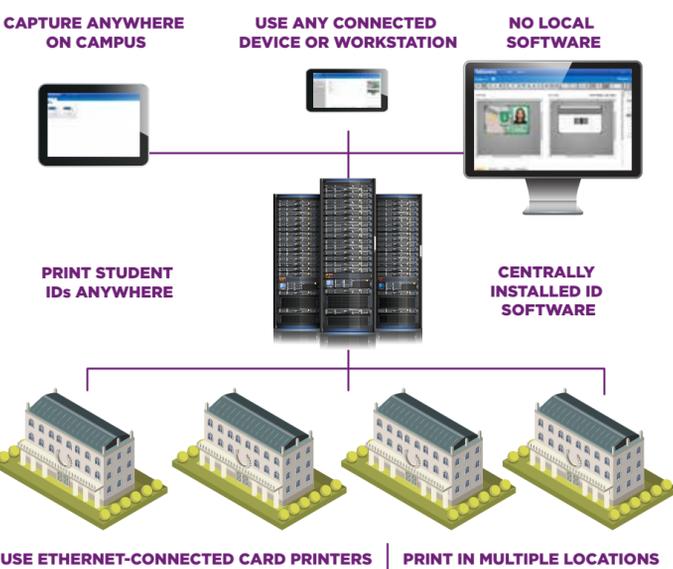

**Support**  
Multiple deployment models.

## THE CHOICE IS CLEAR

### Distributed

Distributed enrollment and issuance uses centrally installed ID software to capture data and print student IDs anywhere on campus using ethernet-connected card printers.

### Tethered

Traditional tethered ID card enrollment and issuance is dependent on static locations, cables, cords and inconvenience.

## Distributed

Deploy quickly—capture and print anywhere.

## FEATURES & BENEFITS

Enroll and issue from anywhere (desktop, tablet, phone)

**Mobility and convenience**

Single server vs. multi PC installations

**Simplifies IT process and support**

Decouples enrollment process from issuance

**Improves efficiency and eliminates lines**

Decouples photo process

**Capture photos anywhere**

Custom template migration tool

**Ease for upgrading and switching software; no rework or duplication**

Install and license on server only for concurrent users

**No dongle needed**

No printer drivers

**Scalability**

**ENTRUST**

Unlock the potential of ID programs with distributed ID card enrollment and issuance.
