Flagship high-volume card issuance solutions

Powerful integrated software: Controller Software provides a single interface for all interactions with the MX6100 System. This powerful software manages seamless access to the system, enables creation of card and job setups, and tracks production level audits to empower card operation efficiency and security.

Innovative inline technologies: Provide stunning, high-quality, edge-to-edge printing on cards and labels or sleek flat-card designs with UV-curable printing technologies, all inline to help deliver unique and highly personalized eye-catching designs.

True field modularity: Provides a full suite of personalization technologies and your choice of card delivery options. The common MX Series Software Platform gives you freedom, flexibility, and investment protection as you continue to build your operation. Start with the capabilities you need, then expand the system as your program requirements change.

Smart card productivity: An innovative smart card module — powered by Adaptive Issuance™ Chip Interface Software — features a barrel dual interface design and choice of couplers to accommodate any combination of contact, contactless, dual interface, or combi smart cards.

Intelligent quality assurance: Advanced intelligence built into the MX6100 System enables fully automated, inline quality assurance for all personalization, including embossed characters along with correct matching of cards, carriers, and inserts.

Service and support: The MX Series Systems are supported by the industry's largest service and support network, which spans more than 150 countries worldwide. Online and phone support is available 24/7.

MX6100 Card Issuance System

Flexible, feature-rich card-to-envelope solutions

With the MXD611 System, you can choose from the following modules and options:

- Card Affixing
- Vertical Card Placement
- Black and White Printer
- Color Printer
- Pre-printed Form Feeder
- Flex-form
- Form Buffer
- Form Folders
- Card Carrier Stock and Template Verification
- Card Carrier Sorter
- Form Stacker

WIN THE HEARTS, AND WALLETS, OF YOUR CUSTOMERS.

In the constant fight for consumer mindshare, it's easy to see how any message could get lost in the shuffle. The key to breaking through this clutter... deliver personalized and relevant content. True personalization delivers what your prospects or customers are looking for and leads to better response rates. In 2008, Customer products that organizations that excel in personalization will exceed companies that don't by 20%.

On-demand print technologies provided by Entrust Dilettand help take individualization to the next level without creating an extensive burden to your operations. By reducing pre-printed stock and waste, you can drive cost savings against the bottom line. In one step, you have the ultimate flexibility to create a customized package that fits your needs and wins wallet share.

CUSTOMIZATION METRICS OF SUCCESS

- Increase Card Activation: **54%**
- Increase Sales: **14%**
- Increase Transition Velocity: **15-20%**
- Increase in customer retention: **5%**
- Increase profits up to: **25%**

DRAMATICALLY IMPROVE OPERATIONAL EFFICIENCY

3 Key Ways You Can Utilize Inflex On-Demand Print Technologies to Personalize Your Card Mailings

1. Reduce stock and waste by printing with a blank card, label and color stock.
2. Unleash your creativity with personalized cards and labels that feature striking, edge-to-edge design and also improve operational efficiency.
3. Personalize the card carrier, affix the cards and labels to create a completely custom mail package.

Make a big impact with cardholders

With larger card carriers and bold color printing, you now have more opportunities for customized 1:1 marketing that can help you build stronger relationships with your cardholders. Use the extra space for personalized marketing messages that encourage card activation and usage as well as images that reflect the cardholder's lifestyle and interests. Promote coupons, special offers, advertising, and cross-selling opportunities to grow revenue.

DATACARD® MXD611™ CARD DELIVERY SYSTEM

Streamlined data flow: Both card personalization and card delivery systems use one set of data and file names — resulting in increased data security and reduced IT interventions.

On-demand color printing: High-quality printing helps reduce pre-printed forms. Crisp, full-color, near-edge printing makes it easy to add visual impact and promotional content to your mailings.

Flexible form sizes: This additional real estate is perfect for printing expanded terms and conditions and adding cross-promotional content to your mailers.

Regroup production to drive uptime & efficiency: Card carrier sorting provides the flexibility to remove inefficiencies from the inline process and/or reorganize finished card carriers to maximize production.

Support market trends: Meet the growing vertical card trend without limiting job sizes based on card orientation. Dynamically place cards on carriers horizontally and vertically to meet customer requests.

MXD611 Card Delivery System

Comprehensive envelope insertion

Bring the reliability and security you need to complete high-quality finished mailings by adding robust inserting capabilities. Include a variety of additional inserts and forms to your card mailings to add a personal touch to each package and help build lasting relationships with your customers.

DATACARD® MXi610™ ENVELOPE INSERTION SYSTEM

Maximize uptime and efficiency: To drive continuous inline advantages, the MXi610 System offers a robust envelope insertion system. Built-in automation throughout the process helps ensure fast job changes with minimal downtime and operator intervention.

Divert and sort: Control your production priorities and drive your system based on business needs. Enhanced functionality allows you to automatically divert mail packages, rank important deliveries, and organize output for efficient distribution.

Selective insertion: Intelligence built in to help drive larger job runs and production throughput.

Precise packages: Inline verification automatically weighs each package or checks the thickness of each piece to verify that the envelope has the correct cards, carriers, and inserts for each cardholder — every time.

Customized packages: Print on-demand, personalized messaging, or static logo graphics on the envelope.

Support rewards programs: Card carrier feeding supports the insertion of additional card carriers in a single package. This allows for more gift or reward cards to be bundled in one package.
