# Entrust Digital Card Solution

HIGHLIGHTS
The future of credentialing

Create a best-in-class digital-first payment and banking experience for cardholders.

With the Entrust Digital Card Solution, you can instantly provide digital payment credentials from your bank or credit union's mobile application to a cardholder's mobile wallet.

KEY FEATURES & BENEFITS
One solution for all digital card services

- **NFC Issuer Wallet:** Turn the mobile banking app into an NFC wallet

- **X-Pays and Merchants Push:** Conveniently and securely push the cards into Apple Pay, Google Pay, Fitbit Pay, Samsung Pay, Click to Pay, and e-commerce merchants from the mobile banking app

- **Token Manager:** Let the cardholder self-manage their digital cards

- **Card Display:** Securely display the card information in the application

- **PIN Display/Change:** Securely display the PIN in the application and let your cardholders choose their PIN

- **Strong Customer Authentication:** Chip-like security of payment solutions provides super secure, convenient customer authentication

- **Card Alerts & Transaction Controls:** Enable cardholders to deactivate lost or stolen cards via bank's application, and to set thresholds and alerts
