

Partnership Announcement – Quick Start Guide

To	Entrust Sales and Service, Entrust Channel Partners Sales and Service
From	Instant Identity Issuance (IID) Product Team
Date	28-May-2024
Subject	Entrust Instant ID Issuance Solution Integration with ISONAS Pure Access Cloud Software Access Control Solution from Allegion.

Announcement

Entrust, a global leader in trusted identity, payments, and digital infrastructure, is pleased to announce the integration of Entrust Instant ID Issuance with ISONAS Pure Access Cloud access control software solution from Allegion to automate issuing physical access ID cards. This access control integration provides automated credentialing, improved efficiency, and additional flexibility.

Product Overview

Integrating Entrust Instant ID Issuance software with Pure Access Cloud is a significant development for organizations looking to improve their security posture. By using this integrated technology, organizations can:

- *Improve security with various secured features to protect user identities by issuing a secure physical ID that integrates seamlessly with the Isonas access control system.*
- *Reduce costs by integrating multiple systems to issue a secure physical ID.*
- *Increase efficiency by using an access control system when enrolling new customers and issuing fast authorization.*

Are you an organization that uses ISONAS Pure Access Cloud software from Allegion? We encourage you to learn how Entrust Instant ID Issuance software can help you improve your security posture. To learn more, please visit our website or contact us today.

Benefits of Instant ID Software

- Easy to deploy with installation on a browser-based platform, making it accessible for data capture and issuance from anywhere on the network, including mobile devices. Scalable to meet the needs of organizations of all sizes.
- Secured features to protect user identities, including secure printing and chip encoding.
- Built to work as part of an integrated system with Entrust printers, supplies, support
- Easily integrated with third-party databases or applications

- Memory: 4 GB (8 GB recommended)
- Hard Drive: 1 GB of computer drive space
- Desktop or PC Screen Resolution: 1360 x 768 (minimum)

Licensing

The integration service requires an Instant ID 8.7 Enterprise Edition or above.

Supported Printer Models?

Instant ID 8.7 supports a wide range of Entrust Desktop Issuance printers. These Sigma DS1, DS2, DS3 Direct to Card printers, as well as legacy printers SD160, SD260, SD360, SD460, CD800, CD800 CLM, CE840, and Artista CR805 Retransfer printers.

What is Required to Start Producing a Secure Physical Access Control Card?

- Allegion's Isonas Pure Access Cloud Software system to control access to your facilities and provide secure access to the users' database.
- Entrust Instant ID Enterprise software to create and print physical IDs.
- A compatible Entrust printer with a built-in smart encoder to produce your ID cards.
- Using high-quality plastic cards ensures your ID cards are durable and professional.
- You can add images, logos, and text to your ID cards to make them more visually appealing and to add additional information.

FAQ

Q: *What version of Entrust Instant ID is required for the integration?*

A: *The integration requires the Instant ID Enterprise edition to work with the Allegion Isonas Pure Access Cloud Software.*

Q: *If I already have Entrust Instant ID software, can I still get the integration work with Allegion Pure Access Cloud Physical Access Control Software?*

A: *The answer is yes. Make sure to upgrade your Entrust Instant ID software to the latest release of the Instant ID Enterprise edition.*
