

## DATA SHEET

# Genuine supplies for the Entrust Artista® RS4 Instant Issuance System

## Unmatched performance and quality

The Artista RS4 Instant Issuance System is designed to deliver peak performance with its proprietary print ribbons and retransfer materials, optimized specifically for the RS4. Equipped with our advanced RFID technology, the system ensures that once genuine Entrust supplies are detected, all premium features are activated, guaranteeing flawless card production.

## Why choose Entrust genuine supplies?

- **Exceptional Print Quality:** Our system-matched supplies are engineered for superior image clarity and vibrant color reproduction, ensuring your cards always look professional and impressive
- **Reliable and Secure:** With Entrust genuine supplies, you benefit from consistent, high-quality printing, enhanced security features, and the peace of mind that comes with using trusted products

- **Global Accessibility:** Our extensive network ensures you have quick access to the supplies you need, wherever you are, so you can maintain smooth and uninterrupted operation

Look for our distinctive blue cores with platinum flecks to ensure you're using authentic Entrust supplies, designed to keep your Artista RS4 running at its best. Choose the Artista RS4 for reliable, high-performance card issuance that meets the highest standards of quality and security.

Optimizing card durability is critical for meeting the rigors of financial card users. We recommend taking advantage of printer in-line application of secondary film layer to card front personalization. Our CMYK-Ki Combo ribbon kit provides a simple all-in-one supply kit for yields supporting extended card durability.

Ensuring the right fit when it comes to card life expectations is critical for financial card issuance programs. The Artista RS4 has a simple solution for increasing card durability that stands up to life's demands. Adding a second layer of retransfer film during printing application is easy with a simple setting change to the card profile manager.

**C = Cyan, M = Magenta, Y = Yellow, K = Black, P = Primer, I = Interceptor/Inhibitor, R = Receptor**

For use with PVC cards and PVC composite cards. Use with polycarbonate or other card types may not be suitable and requires specific card compatibility testing.
