

# Entrust Genuine Supplies

Desktop Supplies for the Entrust CD820™ Card Printer

## Demand peak performance

Only Entrust Genuine Supplies can ensure you'll get the most out of your Entrust CD820™ Card Printer. Entrust printheads, ribbons, and cleaning supplies leverage our patented technology to help you achieve the best image quality, most reliable printer performance and lowest possible cost-per-card. Because Entrust ribbons are designed exclusively for your printer, they work together to provide automated color and image density adjustment, ribbon usage tracking, and ribbon conservation.

## Streamlined performance

Print speed and performance are critical in enterprise settings. By using Entrust Genuine Supplies with patented Intelligent Supplies Technology™, your CD820 Card Printer can run smoother, save more energy, and print more vibrant images.

## Smarter supplies

The CD820 printer utilizes system-matched patented ribbons to activate exclusive printer features. When installed, the Entrust proprietary ribbons enable all the enhanced product features that allow you to print enterprise-quality cards more easily.

Once the Entrust ribbon is loaded into the CD820 printer, the printer driver automatically adjusts its settings to match the ribbon type. This ensures the best possible image quality on the cards. The CD820 printer and supplies collectively track ribbon consumption and notify you of an upcoming ribbon replacement.

## Boost productivity by reducing waste

The CD820 printer technology saves more ribbon so you can eliminate waste and reduce supplies costs. When printing with genuine Entrust monochrome panel ribbons, the printer advances the ribbon to the appropriate length needed. Entrust color panel ribbons save one complete panel set during each initialization, while Entrust monochrome ribbons can potentially double and triple the standard yield.

Combined with the CD820 printer's industry-leading print speeds of up to 220 full-color, one-sided cards per hour, you can issue more cards per hour while reducing ribbon waste.

## Eco-friendly operation

The Entrust biodegradable ribbon cores are made with EcoPure® additive to help you reduce your impact on the environment. These new cores offer the same lifecycle, performance, and reliability as the previous model without adding waste to landfills.

## Outstanding print quality

The quality and sharpness of printed cards is dramatically improved with optimized print ribbons and user-adjustable image and color controls. TrueMatch™ color management emulates the internet standard sRGB color space to better match on-screen colors to colors printed on the card, reducing the hassle of manual color adjustment. Combine this technology with the CD820 printer's industry-leading print resolutions of up to 300 x 1200 dpi to reproduce fine text and bar codes as crisp and brilliant as they appear on your screen.

## Enterprise quality without complexity

Using Entrust supplies with your user-friendly CD820 printer greatly reduces the amount of time spent installing and maintaining your printer.

When a new ribbon is needed, the CD820 printer alerts you with an illuminated icon on the soft-touch display panel. The reloadable supply cartridge includes both printer ribbon and drop-in cleaning roller and loads conveniently into the top of the printer without the need for adjustments. Simply open the printer cover, replace the print ribbon and cleaning sleeve, and continue printing.

Regular cleaning operations can keep your CD820 card printer and your workday running smoothly. Entrust offers cleaning supplies designed specifically for maintaining your printer, helping to prevent mishandled cards, diminished image quality, or damaged printheads.

All ribbons are packaged as a kit and include one adhesive cleaning sleeve and one isopropanol cleaning card. Additional cleaning supplies can be ordered separately if more frequent cleaning is required.

Y = Yellow M = Magenta C = Cyan K = Black F = Fluorescent T= Inline Topcoat. Each kit includes: one ribbon, one isopropanol cleaning card, and one adhesive cleaning sleeve. Additional cleaning cards and cleaning sleeves can be ordered separately.

\* The stated ribbon yield in our documentation is typically the maximum number of cards or printed images that can be produced with that ribbon.

<sup>1</sup>Actual yields for monochrome ribbons may be greater due to ribbon saver features.

<sup>2</sup>Recommended for two-sided printing only.
