Entrust Certified Supplies

SD Series Card Printers

### Intelligent Supplies Technology™

SD Series card printers (SD260™, SD360™) feature system-matched Entrust-patented ribbons that activate additional features exclusive to Entrust. Upon installation, the Entrust proprietary ribbons enable all enhanced product features that help you print high-quality cards more easily.

When a genuine Entrust ribbon is loaded into an SD Series card printer, the driver automatically adjusts printer settings to match the ribbon type and helps ensure the best possible image quality on the cards. The printer and supplies then collectively track ribbon consumption and notify you of an upcoming ribbon replacement.

Remarkable image quality

Enhancements in SD Series card printing technology dramatically improve quality and sharpness of photos, graphics, and logos by utilizing optimized print ribbons and user-adjustable image and color controls.

TrueMatch™ technology in SD Series card printers emulates Microsoft-based sRGB color space to seamlessly reproduce on-screen images onto the card. This provides better color matching and reduces the amount of color adjustments needed, creating less hassle for you.

ENSURE PEAK PERFORMANCE

Insist on Entrust Certified Supplies for your Entrust SD Series card printer. Designed exclusively for the printer, our printheads, ribbons, and cleaning supplies can help you achieve the best image quality, most reliable printer performance, and lowest possible cost-per-card. Genuine Entrust ribbons also leverage our patented technology to provide automated color and image density adjustment, ribbon usage tracking, and ribbon conservation.

Certified Supplies for Entrust SD Series Card Printers

Environmentally conscious supplies

The SD Series printing technology can help eliminate waste with the ribbon saver feature.

- Entrust color panel ribbons save one complete panel set during each initialization

- Entrust monochrome ribbons use material length needed for the card design for significant yield savings, which can potentially double and triple the standard yield

To help you reduce waste and help the environment, Entrust ribbon cores are made with a biodegradable material. Packaging is also biodegradable, made from 100% recycled material and printed with soy inks

Convenient installation and cleaning

Replacing supplies is quick and easy in an SD Series card printer with a reloadable supplies cartridge with drop-in cleaning roller. The cartridge includes a print ribbon and cleaning sleeve, and it snaps in place without the use of additional tools or adjustments. Simply open the supplies cover, swap out the old ribbon with the new one, and resume printing.

Regular cleaning operations will help you keep your SD Series card printer running at peak performance. Entrust offers cleaning supplies designed specifically for maintaining your printer and helps prevent mishandled cards, diminished image quality, or damaged printheads.

All ribbons are packaged as a kit and include all the necessary cleaning supplies. This package includes one ribbon, one adhesive cleaning sleeve, and one isopropanol cleaning card. When more frequent cleaning is required, additional cleaning supplies can be ordered separately.

Certified Supplies for Entrust SD Series Card Printers

Your best choice for supplies

Protect your investment in Entrust solutions by choosing only genuine Entrust Certified Supplies. We engineer superior performance and reliability into every system-matched supply item we offer. For you, that means smooth printing, brilliant image quality, high security, and exceptional performance. Our worldwide representation provides fast, direct connection with the supplies and support you need, when and where you need them. To ensure you are using Entrust Certified Supplies, purchase only from authorized Entrust distributors.

Y = Yellow, M = Magenta, C = Cyan, K = Black, T = Inline Topcoat, F = Fluorescent, HQ = High Quality

Each kit includes: one ribbon, one isopropanol cleaning card, and one adhesive cleaning sleeve. Additional cleaning cards and cleaning sleeves can be ordered separately.
1 Actual yields for monochrome ribbons may be greater due to ribbon saver features.
2 Recommended for two-sided printing only.
* Ribbon yields: Panel ribbon yields stated are typically the maximum number of panel sets per roll. Monochrome ribbon yields may achieve up to three times greater the stated yield due to Entrust ribbon saver features and card print design.

ABOUT ENTRUST CORPORATION

Entrust keeps the world moving safely by enabling strong identities, secure payments, and protected data.We offer an unmatched breadth of solutions that are criticial to the future of secure enterprises, governments, the people they service, and the data transactions associated with them. With our expers serving customes in more than 150 countries and a network of global partners, it's no wonder the world's most trusted organizations trust us.
