SECURING A WORLD IN MOTION

Global Sustainability Report

Supplier name: Entrust Corporation

Publication date: February 2026

Commitment to Achieving Net Zero

Entrust is committed to achieving Net Zero greenhouse gas (GHG) emissions for Scopes 1 and 2 by 2050. This is outlined in a formal commitment letter signed by our Chief Executive Officer, which is publicly available at www.entrust.com. We have partnered with Watershed, a leading climate platform and consultancy, to calculate Scopes 1, 2, and 3 GHG emissions.

Methodology:

Entrust aligns our greenhouse gas (GHG) emissions reporting with our fiscal year (April 1 – March 31). This report describes our baseline FY23 (1 April 2022 – 31 March 2023) and FY25 (1 April 2024 – 31 March 2025) emissions which were calculated following the World Resources Institute (WRI) and the World Business Council for Sustainable Development (WBCSD) GHG Protocol Corporate Standard, using the Watershed platform. Entrust opted to use Watershed's CEDA methodology which replaces the US based EEIO model used in previous measurement years. By changing to the CEDA model, global emissions are more accurately account for but may also result in higher reported emissions. Entrust will need to rebase line to accommodate this change in methodology.

Details Related to Baseline Emissions Footprint:

The measurement uses an operational boundary approach in accordance with Greenhouse Gas Protocol on corporate accounting and reporting. The measurement itself is audit-grade and hosted on Watershed's platform. The measurement includes a comprehensive Scope 1, Scope 2, and Scope 3 evaluation using both primary activity data as well as spend based emission factors.

Baseline Emissions Footprint

Baseline Year: 1st April 2022 to 31st March 2023
Additional Details relating to the Baseline Emissions calculations:
Entrust previously reported a baseline year of 1st April 2021 to 31st March 2022 that did not include Scope 3 information. The new baseline year includes full Scope 1, Scope 2, and partial Scope 3 GHG

measurement. The current emissions reporting (1st April 2024 to 31st March 2025) includes expanded Scope 1, Scope 2, and all relevant Scope 3 GHG emissions for global operations.	
ACTIVITY	TOTAL (MTCO _{2e})
Scope 1	2,396
Scope 2 (location-based)	4,380
Scope 2 (market-based)	1,691
Scope 3 category 1: Purchased goods and services	15,151
Scope 3 category 2: Capital goods	48,805
Scope 3 category 3: Fuel-and-energy-related activities (not included in Scope 1 or 2)	2,033
Scope 3 category 4: Upstream transportation & distribution	3,263
Scope 3 category 5: Waste generated in operations	306
Scope 3 category 6: Business travel	5,232
Scope 3 category 7: Employee commuting	4,029
Scope 3 category 8: Upstream leased assets	0
Scope 3 category 9: Downstream transportation and distribution	0
Scope 3 category 10: Processing of sold products	0
Scope 3 category 11: Use of sold products	0
Scope 3 category 12: End-of-life treatment of sold products	0
Scope 3 category 13: Downstream leased assets	0
Scope 3 category 14: Franchises	0
Scope 3 category 15: Investments	0
Total GHG emissions (location-based)	85,595
Total GHG emissions (market- based)	82,906

Current Emissions Reporting

Current Year: 1st April 2024 to 31st March 2025	
ACTIVITY	TOTAL (MtCO _{2e})
Entrust obtain Limited Liability Insurance for all three emission Scopes (Entrust's Verification Opinion is appended to the end of this document)	
Scope 1	2,361
Scope 2 (location-based)	4,263
Scope 2 (market-based)	1,617
Scope 3 category 1: Purchased goods and services	89,996

ENTRUST

SECURING A WORLD IN MOTION

Scope 3 category 2: Capital goods	1,306
Scope 3 category 3: Fuel-and-energy-related activities (not included in Scope 1 or 2)	1,541
Scope 3 category 4: Upstream transportation & distribution	5,809
Scope 3 category 5: Waste generated in operations	201
Scope 3 category 6: Business travel	10,101
Scope 3 category 7: Employee commuting	3,215
Scope 3 category 8: Upstream leased assets	0
Scope 3 category 9: Downstream transportation and distribution	0
Scope 3 category 10: Processing of sold products	0
Scope 3 category 11: Use of sold products	0
Scope 3 category 12: End-of-life treatment of sold products	14,461
Scope 3 category 13: Downstream leased assets	0
Scope 3 category 14: Franchises	0
Scope 3 category 15: Investments	0
Total GHG emissions (location-based)	133,253
Total GHG emissions (market- based)	130,607

A Focus on Sustainability and Compliance:

Entrust have been working diligently for several years towards becoming a more environmentally sustainable business. Key examples of our work in this area include the following:

ISO 14001 Certification

Entrust's global headquarters (which includes its on-site manufacturing) employs an ISO-registered environmental management system, ensuring our organization continually improves our environmental performance. Recognized as a worldwide environmental management standard, compliance to International Standard ISO 14001:2015 confirms to our customers that our environmental management system takes into account all environmental issues relevant to our operations, such as air pollution, water and sewage issues, waste management, soil contamination, climate change mitigation and adaptation and resource use and efficiency.

Our facility has been certified since 20 May 2023. To ensure ongoing compliance, Entrust's environmental management system is audited annually by Bureau Veritas, an internationally recognized external certification body. Our certification is publicly available on www.entrust.com.

Product Compliance

REACH (Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)) is a European Union (EU) chemicals regulation that entered into force on 1 June 2007, with phased deadlines to 2018.

Entrust supports the overall REACH objective of improving the protection of human health and the environment. Our long-standing policy is to provide products and services that are safe to use and have a low environmental impact throughout their lifecycle. We meet all applicable REACH requirements and are committed to providing our customers with information about the chemicals in our products as needed to comply with REACH.

Carbon Reduction Projects:

Entrust is committed to delivering its operational obligations and to reducing its overall carbon footprint. In the period covered by the report, Entrust:

- Received recertification for the ISO 14001:2015 standard at its global headquarters (GHQ), and principal manufacturing facility, in Minnesota, USA.
- Continued its partnership to recycle electronics through PCs for People. Through the end of FY25, this partnership has resulted in 38,061 pounds of e-waste being saved from a landfill and prevented 300.06 MTCO₂e from entering the atmosphere.
- Retired 238 environmental credits in support of a project focused on plugging orphan oil and gas wells in the United States and Canada.
- Participated in a renewable energy program that covered more than 7 million kilowatt hours of electrical consumption over the fiscal year at our global headquarters and principal manufacturing center. In the future year we aim to implement further measures, such as:
 - Implement energy efficiency measures across global facilities in support of our Scope 1 and 2 reduction target by:
 - Replacing gas space heating in offices with heat pumps and power with renewable energy and o Replacing grid electricity with clean electricity
- Explore Scope 3 reduction measures across operations and supply chains

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol Corporate Standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Verification Opinion Entrust Corporation (Entrust). FY2025 GHG Inventory

Background

Cameron-Cole, LLC (Cameron-Cole) was retained by Entrust Corporation (Entrust) to perform an independent verification of its greenhouse gas (GHG) Emissions Inventories for fiscal year (FY) 2025 from April 1, 2024 to March 31, 2025. The Scope 1 and 2 GHG Inventory was developed according to the World Resources Institute (WRI)/World Business Council for Sustainable Development (WBCSD) Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (2004 revised edition) along with its associated amendments. The Scope 3 GHG Inventory was prepared using the WRI/WBCSD Corporate Value Chain (Scope 3) Accounting and Reporting Standard dated September 2011 and associated amendments. Our opinion on the results of the inventory, with respect to the verification objectives and criteria, is provided in this statement.

Responsibility of Entrust & Independence of Verification Provider

Entrust has sole responsibility for the content of its GHG Statement. Cameron-Cole accepts no responsibility for any changes that may have occurred to the GHG emissions results since they were submitted to us for review. Based on internationally accepted norms for impartiality, we believe our review represents an independent assessment of Entrust's FY2025 GHG Emissions Inventory. Finally, the opinion expressed in this verification statement should not be relied upon as the basis for any financial or investment decisions.

Level of Assurance

The level of assurance is used to determine the depth of detail that a Verification Body designs into the Verification Plan to determine if there are material errors, omissions, or misstatements in a company's GHG assertions. Two levels of assurance are generally recognized—reasonable and limited. Reasonable Assurance generates the highest level of confidence that an emissions report is materially correct (with the exception of Absolute Assurance which is generally impractical for companies to achieve). Limited Assurance provides less confidence and involves a less-detailed examination of GHG data and supporting documentation. Limited Assurance statements assert that there is no evidence that an emissions report is not materially correct. Cameron-Cole's verification of Entrust's GHG Emissions or Inventory for FY2025 was constructed to provide a Limited Level of Assurance.

Objectives

The primary objectives of this verification assignment were as follows:

- Verify whether Entrust's FY2025 GHG Emissions Inventory meets the generally accepted GHG emissions accounting principles of accuracy, completeness, transparency, relevance, and consistency;
- Determine if Entrust has reported all emissions in conformance with the WRI/WBCSD GHG Protocol; and
- Determine whether or not Entrust's FY2025 GHG Emissions Inventory meets/exceeds the 95 percent threshold for accuracy.

Verification Criteria

Cameron-Cole conducted verification activities in Entrustment with the principles of ISO-14064-3:2019(E) Specification with guidance for the verification and validation of greenhouse gas statements. The Entrust's GHG statement was prepared to, and verified against, the WRI/WBCSD GHG Protocol and WRI/WBCSD Corporate Value Chain (Scope 3) Accounting and Reporting Standard.

Verification Scope & GHG Statement

The scope of the verification covers Entrust's FY2025 GHG Emissions Inventory with the following boundaries:

- **Geographical:** Worldwide
- **Chemical:** carbon dioxide (CO₂), methane (CH₄), nitrous oxide (N₂O), and hydrofluorocarbons (HFCs)
- **Organizational Boundary:** Reporting under operational control; approximately 40 owned and leased facilities (offices and data centers).
- **Operational Boundary:** The following sources/emissions were identified in Entrust's organizational boundary:
 - Scope 1
 - Direct emissions from stationary combustion sources: fuel
 - Direct emissions from mobile combustion sources: company-owned vehicles
 - Direct fugitive emissions: refrigerants
 - Scope 2
 - Indirect emissions from purchased electricity

- Scope 3
 - Category 1: Purchased goods and services
 - Category 2: Capital goods
 - Category 3: Fuel- and energy-related activities
 - Category 4: Upstream transportation and distribution
 - Category 5: Waste generated in operations
 - Category 6: Business travel
 - Category 7: Employee commuting
 - Category 11: Use of Sold Products

In FY2025, Entrust reported 2,361 metric tons (MT) of carbon dioxide equivalent (CO₂e) of Scope 1 direct emissions, 4,263 MT CO₂e of Scope 2 location-based emissions, and 1,617 MT CO₂e of Scope 2 market-based emissions. Additionally, Entrust also reported 126,629 MT CO₂e of Scope 3 location-based.

Verification Opinion

Based on the method employed and the results of our verification activities, Cameron-Cole has found no evidence of material errors, omissions, or misstatements in Entrust’s FY2025 GHG Statement. Cameron-Cole also found that Entrust’s GHG accounting and calculation methodologies, processes, and systems for this inventory conform to the WRI/WBCSD GHG Protocol and WRI/WBCSD Corporate Value Chain (Scope 3) Accounting and Reporting Standard.
