

ENTRUST

Public key infrastructure (PKI) basic training course

Service description

Entrust PKI basic training is a two-day on-site classroom course designed for the customer's team members involved in PKI operations.

Students gain a foundational understanding of today's cryptographic systems and PKIs. The class is a mix of lecture, real-world use cases, and hands-on exercises.

Upon training completion, your team will have the knowledge to plan and deploy PKIs. This results in faster, more cost-effective project execution. Additionally, your team will be equipped to optimize maintenance, avoiding downtime due to common mistakes and errors.

During the execution of the PKI basic training course, the following agenda topics will be covered;

- Foundations of PKIs
 - PKI fundamentals
 - Establishing a PKI
 - PKI operations
- PKI management
 - PKI monitoring
 - PKI disaster recovery
 - Secure PKI deployment
- Lab exercises
 - Certificate enrollment
 - Web enrollment
 - Disaster recovery

Public key infrastructure (PKI) basic training course

This engagement will provide the following deliverables:

- All training materials

Customer agrees that engagement will be deemed accepted upon execution of course agenda and delivery of course material defined herein.
